

Eric George

Designer & Front End Developer

mobile: 07763 846154

location London

email: errkkgeorge@gmail.com

date of birth 14th May 1986

website: errkk.co

Creative multidisciplinary web worker with 4 years agency experience aiming to further a digital career and to continue delivering reliable and exciting sites to high value clients. Experienced in producing striking visual design backed up with robust and efficient front-end code. Keen to stay ahead of new developments in technology and trends in design. Loves to tinker and experiment, exploring the best ways to integrate the new and cool with the existing and reliable.

2008 - present

Reading Room Ltd.

Responsible for designing website layouts and interfaces for a range of clients, from startups to large commercial enterprises and government organisations.

My role as a front-end developer involves creating robust yet flexible HTML templates that I make pretty with CSS. I can apply the new features of CSS3, while still accommodating the unfortunate browser choices of many of our public sector clients.

Through an inherent nerdy inquisitiveness, my role at Reading Room has developed into a specialism in WordPress theme (and plug-in) development.

As well as working with a production focus, I enjoy a range of client interaction; including new business meetings, presentations and consulting on technical issues.

2006 - 2007

Reading Room Ltd.

As part of my Industrial Design degree, I worked as a Design Intern at Reading Room.

June - August 2005

Renishaw Plc.

& May - June 2006

I have conducted 2 summer placement jobs at this high-profile international manufacturing company: the first in the Works Engineering Department, and the second in the IT Department.

2004 - 2008

Brunel University, BSc Industrial Design

First Class Hons

1997 - 2004

Katherine Lady Berkeley's School, A Levels

Design Technology: A, Physics: B, Business Studies: B

Notable Skills

Adobe Photoshop, Illustrator & InDesign

Hand coded HTML, CSS & JavaScript / jQuery,

PHP, WordPress, MySQL, & some Linux administration
